COMBAT COVID

COVID-19 TESTING FOR ONSITE STAFF

COVID-19 testing for asymptomatic staff members (those without symptoms) working onsite is restarting! As test sites become available, your department will contact you and provide you with dates, times and locations.

Hear from Montgomery County Executive, Marc Elrich, and Montgomery County Health Officer, Dr. Travis Gayles, on why they strongly encourage COVID-19 testing:

Since COVID-19 testing was last available, a few things have changed...

WHAT'S NEW?

The Department of Health and Human Services (DHHS) has partnered with the Department of Technology Services (DTS) and Microsoft to offer an improved process for registering and receiving results. DHHS has also selected new diagnostic laboratories to provide fast and accurate clinical

sample testing.

HOW CAN I GET STARTED?

As testing becomes available, your department's COVID-19 testing coordinator will help you through the new process onsite. At that time, visit the [Employee Coronavirus Testing](#) webpage for more information.

IMPORTANT TO NOTE: Testing coordinated by departments is done for the convenience of asymptomatic staff members working onsite. However, **anyone can pre-register and walk up at any time** for testing at the [Montgomery County COVID-19 testing clinics](#).
